

Detailed Django Event Management Setup (Completed So Far)

Step 1

Create the EventManagement folder on the Desktop and open it in VS Code.

```
cd Desktop
mkdir EventManagement
cd EventManagement
code .
```

Step 2

Create and activate a virtual environment.

```
python -m venv venv
venv\Scripts\activate
```

Step 3

Install required packages.

```
pip install django pillow stripe qrcode reportlab python-decouple
```

Step 4

Create the Django project named 'event'.

```
django-admin startproject event .
```

Step 5

Create the application.

```
python manage.py startapp myapp
```

Step 6

Create folders (you created these once only).

```
mkdir templates
mkdir static
mkdir media

mkdir static\css
mkdir static\js
mkdir static\images

mkdir media\event_images
mkdir media\profile
mkdir media\qr_codes
mkdir media\tickets
```

Step 7

Run migrations and create admin user.

```
python manage.py migrate
python manage.py createsuperuser
```

Step 8

Run server.

```
python manage.py runserver
```

Step 9

settings.py changes

```
INSTALLED_APPS += ['myapp']

TEMPLATES[0]['DIRS']=[BASE_DIR/'templates']

STATIC_URL='static/'
STATICFILES_DIRS=[BASE_DIR/'static']

MEDIA_URL='/media/'
MEDIA_ROOT=BASE_DIR/'media'
```

Step 10

event/urls.py

```
from myapp import views
urlpatterns=[
    path('admin/', admin.site.urls),
    path('', views.home, name='home'),
]
```

Step 11

myapp/views.py

```
from django.shortcuts import render

def home(request):
    return render(request, 'home.html')
```

Step 12

templates/home.html

```
<!DOCTYPE html>
<html>
<head><title>Event Management System</title></head>
<body>
<h1>Event Management System</h1>
<p>Welcome to the Event Management System.</p>
</body>
</html>
```
